

Notice of Public Meeting

Trenton Lock 1 Hydro Project

In 2014, the provincial Independent Electricity System Operator (IESO) launched a competitive process for the procurement of renewable energy known as the Large Renewable Procurement (LRP) process. The IESO's LRP process is an important component of Ontario's ongoing commitment to building a cleaner and more sustainable energy system, and represents a key step in the province's 2025 target for renewable energy to comprise approximately half of the province's installed capacity. Further details regarding the LRP are available at www.ieso.ca/lrp. Trenton Lock 1 Hydro LP was awarded an energy contract in this procurement process to generate electrical energy from a hydroelectric station at Trenton Dam 1.

Trenton Lock 1 Hydro LP is proposing to develop and operate a hydroelectric station adjacent to Dam 1 located on the Trent-Severn Waterway within the City of Quinte West in Ontario. The installed capacity of the proposed hydroelectric station will be 7 MW and would be connected to the existing distribution system.

This proposed Project is located on a federal waterway and subject to the federal Dominion Water Power Act (DWPA) administered by Parks Canada. It is subject to Parks Canada's Environmental Impact Analysis (EIA) process, developed to fulfill Parks Canada's requirements as a federal land manager under the Canadian Environmental Assessment Act (CEAA), 2012 as well as its legal and mandated obligations to protect Canada's natural and cultural heritage.

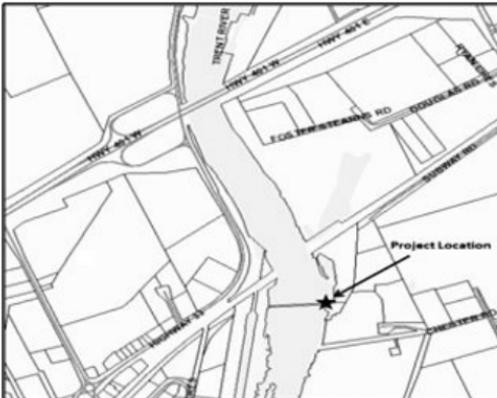

This public community meeting is to seek feedback from the public on the draft Detailed Impact Analysis for the proposed project. The Proponent and Parks Canada will be available to discuss the draft Detailed Impact Analysis for the proposed project. The draft Detailed Impact Analysis will also be available for comment on the following website: <http://hydromega.com/projects-in-development/ontario-lrp-i-rfp.aspx>.

Public Meeting information

Location: Quinte West Arena, Auditorium
8 Couch Crescent,
Quinte West, Ontario,
K8V 1G8

Date: February 22nd 2018

Time: 4:00 PM – 8:00 PM

Contact information for the Proponent:

Daniel Gillenwater, Project Director
Hydroméga Services Inc.
Phone : 514.392.9266
Email: dgillenwater@hydromega.com
